

Academic mobility: Opportunities for students of the specialty of “Space technique and technologies”

On February 22, 2019 at the Department of “Space technique and technologies” was held a meeting between first, second and third course students and the chief of the Department of International Educational Programs A Kiyasheva. O.K Abdirashev, a teacher of the department, was an organizer of the meeting. During the meeting, the following issues were discussed: goals and directions of academic mobility; advantages of knowledge and experience exchange of abroad programs, internal and external academic mobility, as well as objectives of the implementation of main parameters of the Bologna process at ENU named after L.N. Gumilev, which aims to improve access to European education.

The academic mobility allows students to study at a foreign partner university for one semester or one academic year by the programs such as ERASMUS+, MEVLANA, ORHUN.

The meeting was held in warm and friendly atmosphere. Students asked questions and expressed their gratitude for such a motivational and inspirational meeting and expressed the desire to have more meetings in an extended topic in the future.
