

" AT THE BAIKONUR COSMODROME"

Here is 10-day professionally-industrial practice, conducted on cosmodrome " Baikonur." From 12 to 22 June we had a practical training, for our students: rich useful information, a life lesson as a future specialist, as well as advice to V. Anatolyevich's father, who taught us as a professional in his field, devoted his life to the space industry, will forever remain in the future. All the advice was very valuable for us.

From the first day we went to the flying fields. Hot steppe +40C is not a hindrance for the fiery youth. The first flight of the platform № 200. For us, this site is remembered as the launch complex of the PROTON launch vehicle and the complex of 419 launches in history.

eight-stage aggregate unit located on LV the " PROTON"

The next day we visited the airfield number 2. This site began with the Museum "Cosmonautics". Each exhibit of the Museum touched us in a diary with a unique version, value and history. After that, we were lucky to be in history at the legendary No. 1 airfield. This is, of course, the launch complex "Gagarin", from this launch complex for the first time established communication with the spacecraft " Vostok-1 " Yuri Gagarin April 12, 1961.

The last 2 days of production practice, we learned a lot of useful information from the flight fields №42 and №45. At site №42, we learned about how the installation and experimental building of the LV ZENIT works and about the importance of the transport and distribution unit. At site №45 we visited the launch complex of the LV "Zenit", about the launch complex and №46 launches of the VL. It is at this point in the heart awakens a sense of pride. Since at present, the flight platforms № 42, №45 are under the jurisdiction of the Republic of Kazakhstan. Despite the fact that JSC BC "Baiterek" seeks to ensure that these two mentioned flying fields in the future were

independent legal entities of the country, of course, trust and inspire graduates in this industry, graduates, graduates, graduates.

And in order to get an excellent impression of such production practice: rector of ENU.L. N. Gumilyov Sydykov E. B., so that we believe the young generation and made a great contribution to the formation of an independent specialist of the country, head of the Department. Department of STaT Zhakupova A. E., for the fact that each student during practical work showed in what direction in the future it can lead to a thought, our leaders Zhumanbaeva A. S., Aldiyarova.B.T. Also express my gratitude to the Director of ISS by Chelomey Shatalov for giving students information.
