

2-year undergraduates of the Department of "Space engineering and technologies" take part in teaching practice remotely in online mode

On September 3, 2020, at 14:00, an online installation conference was held using video conferencing on the ZOOM platform. Undergraduates were attached in the diaries of curators and teachers. Practice diaries are filled in in a timely manner.

Masters zhumagalieva Aigerim and Abdurashitov Zhanibek, whose scientific supervisor is yergaliev Dastan Syrymovich , teach the subjects of the teacher of the Department of "Space engineering and technology" Anuar Galymzhan. Undergraduates conduct laboratory and practical classes in the subjects "machine Parts" , "Materials science" and "technology of structural materials".
