

Students of the KTiT-33 group of the Department of "Space engineering and technology" undergo practical training in an online format.

Second - year students of the Department of "Space engineering and technology" had to pass an industrial practice at the Baikonur cosmodrome. In connection with the global pandemic, currently (September 27 - November 7) is held in the laboratory of the Department under the Tims program in online format

The Ktit-33 group under the guidance of Anuar Galymzhan Amandykovich, a teacher of the Department, is undergoing practical training. Students fill out a practice diary, get acquainted with laboratory equipment.
