

Manufacturing practice by students of the Ktit-31 and 32 groups of the department of «Space engineering and technology» in an online format.

Second-year students of the department of «Space engineering and technology» had to pass a manufacturing practice at the Baikonur cosmodrome. However, due to the global pandemic, currently (September 27-November 7) practice is conducted in the laboratory of the Department under the tims program in an online format.

Ktit-31 and 32 groups are undergoing manufacturing practice under the guidance of the department's teacher Abdrashev Umirzak Koptleuovich. Students fill out practice diaries and become familiar with laboratory equipment.
