Report of the curatorial hour on the theme "No to religious extremism"

Nur-Sultan

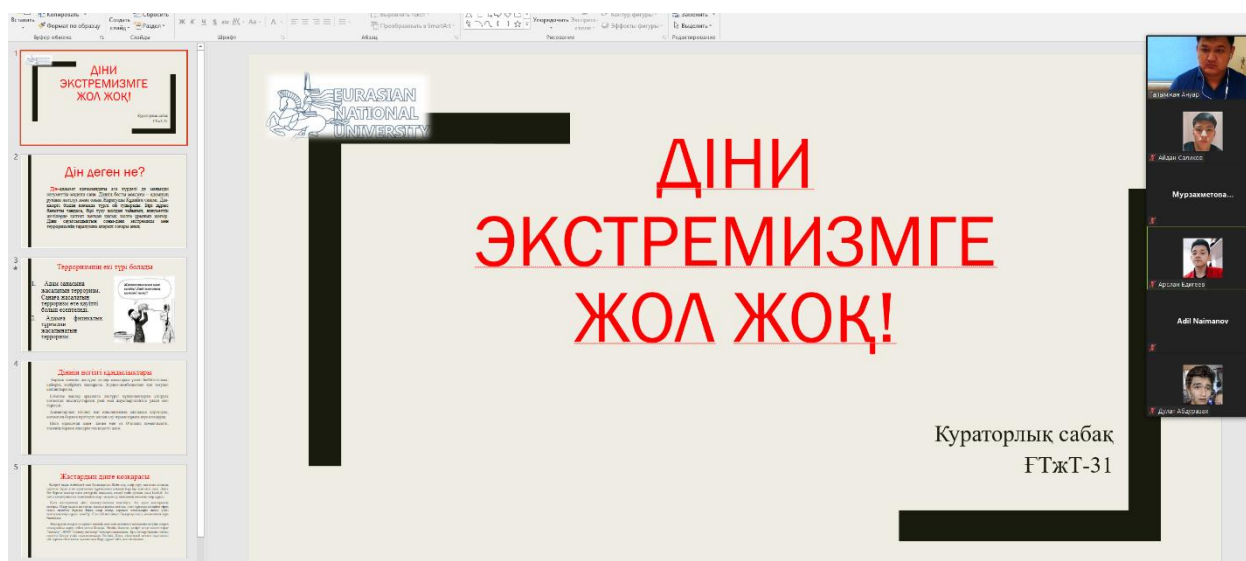

18.09.2020

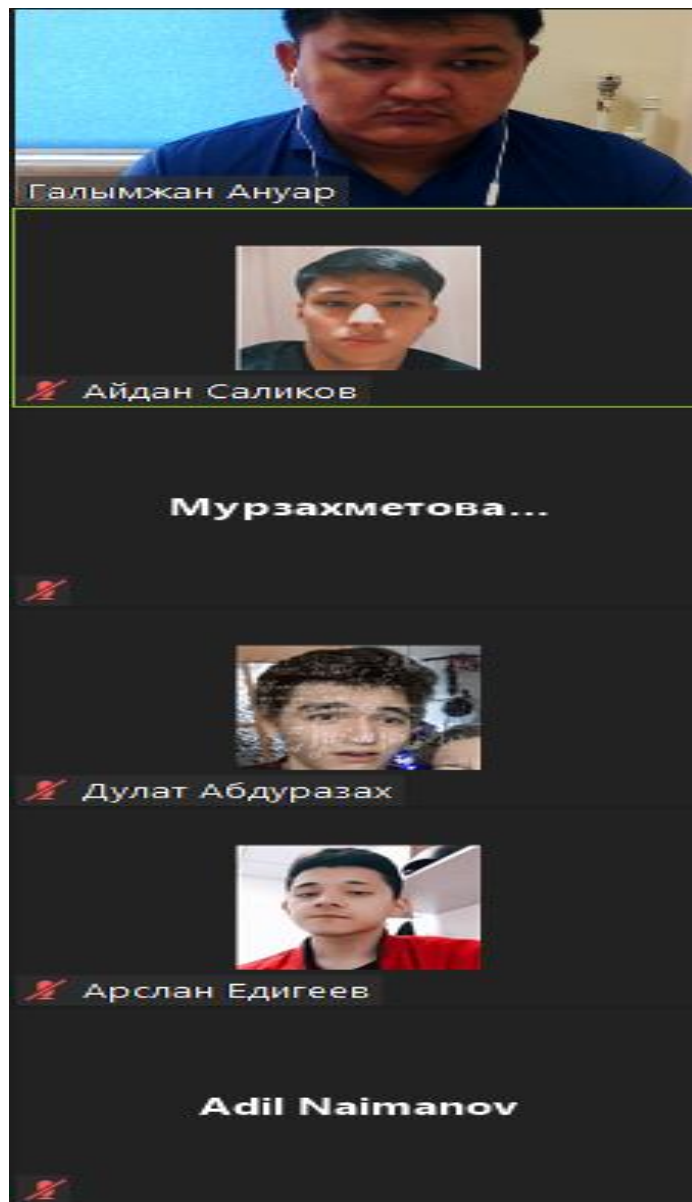

Number of participants: 25

The curatorial hour on the topic "no to religious extremism" was held by the ktit-31.33 group of the Department of space engineering and technology. Curator of the group Anuar Galymzhan noted that there is no way to counteract religious extremism, currently religious illiteracy of young people, independent education on the Internet is impossible. Religion is a complex and important socio-cultural consciousness in human society. The main goal of religion is the spiritual perfection of man and his faith in God the Creator. Religion-in our modern society causes different thoughts.

Due to the lack of religious education, the spread of extremism and terrorism is obvious. The reason why young people do not find their place in life and fall under the influence of other people's religions is that they are neglected. In my opinion, the subjects "religion" and "fundamentals of religion" are taught in schools and universities. I know that these subjects are taught to a child to be religiously literate, but I don't think it's right to keep a young schoolboy very interested in the idea of religion.

Students have changed their religious views enough. The meeting with students was held online.

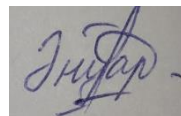

Терроризмнің екі түрі болады

1. Адам санасына жасалатын терроризм. Санаға жасалатын терроризм өте қауіпті болып есептеледі.
2. Адамға физикалық тұрғыдан жасалынатын терроризм .
