

The seminar on “Cable systems of Earth remote sensing spacecraft” at the Department of “Space technique and technologies”

The seminar on “Cable systems of Earth remote sensing spacecraft” was held on 10 April 2019 at the Department of “Space technique and technologies”, in the context of the Decade of Science. Arman Bazarbayev Syzdykov, the Head of Department of “Qazaqstan Garysh Sapary” national joint-stock company, held the seminar.

At the beginning of the report, he briefly explained the structure of the company and familiarized everyone with the projects that have being developed and implemented by the “Qazaqstan Garysh Sapary” national joint-stock company. He further highlighted the work, standards, and stages of control and the requirements for the design and manufacture of cable systems of spacecraft.

A.Y. Zhakupova - the Head of the Department of “Space technique and technologies”, N.A. Burambayeva – the Head of the Department of “Radio engineering, electronic and telecommunications”, teaching stuff, bachelor and master students of the STaT Department attended the seminar. The seminar was very informative and was held in the form of a dialogue between the lecturer Arman Bazarbayevich, faculty and students of the Department.

At the end of the seminar, Almira Yersainovna Zhakupova, the Head of the STaT Department delivered a speech.

She thanked all the participants of the seminar and handed a thank-you note and souvenir gifts to the reporter from Eurasian National University named after L.N. Gumilyov.
