

Meeting of teachers, students of the Department of "Space Engineering and Technology" of the L. N.Gumilyov ENU with specialists of the ground control complex of the Akkol spacecraft

On November 11, 2022, a meeting of specialists of the ground control complex of the Akkol spacecraft and teachers, students of the Department of Space Engineering and Technology of the L. N.Gumilev ENU took place. The main reason for the meeting is to discuss the graduation topics of 4th year students. The discussion was attended by the head of the department "Space Engineering and Technology" Ashurov A. E. and senior teachers Abdrashev O. K., Anuar G. A.

The Space Communications Center "Akkol" is equipped with new technological equipment for managing the national spacecraft of the "KazSat" series. All systems of the center are fully autonomous, independent and designed to continuously perform management tasks, control and maintain the specified technical and ballistic characteristics of the "KazSat" series.

A bilateral memorandum was signed between L. N. Gumilyov ENU and JSC "Republican Center for Space Communications" for conducting students' industrial and pre-graduate practice; consulting on the topics of term papers and theses, master's theses; conducting joint scientific research.

As a result of the discussion, specific tasks were given by specialists on diploma topics. An excursion was made with the ground control complex of the Akkolsky spacecraft.
