

Round table in the Akimat of Nur-Sultan

On April 8, 2021, at the center of the innovation ecosystem development, an exchange of views took place between representatives of the Nur-Sultan Akimat and the L.N. Gumilyov ENU.

This meeting was attended by:

from the side of Akimat: Kenzhegaliev Zh.G. – Head of the Center for Development of the Innovation Ecosystem, Kurmanbaev D.Zh. – Chief Manager, Mausymbaev Zh.U. – Chief Manager, Saylybaev Zh.B. – Managing Director of JSC «Astana Innovations»;

from L.N. Gumilyov ENU: Professor Kassymov U.T., Otegali S.M. – Director of SKTB, Zhanbyrshy A.S. – Chief Project Manager of SKTB, Berikkyzy M.B. – Master's student of the final course of the Department of Space Engineering and Technology.

First, Kenzhegaliev Zh. made a report on the goals and objectives of the innovation ecosystem development center.

Professor of the Department of Space Engineering and Technology of the L.N. Gumilyov ENU Kassymov U.T. made a presentation report on innovative projects of the Special Design and Technology Bureau «Aerospace and Special Engineering».

In particular, the akimat was offered projects:

1. Environmentally friendly vertical takeoff and landing vehicle to solve traffic congestion problems;

2. Design of a tethered balloon for cleaning and improving the ecological state of the air basin.

3. The project of a stationary tethered balloon complex to ensure stable 4G, 5G and WI-FI communication. This complex has a multifunctional purpose, including stationary round-the-clock monitoring of city blocks and streets.

There was a discussion of projects and an exchange of views. Akimat representatives emphasized the special significance of these projects for the economy of Kazakhstan and promised to assist in the implementation of these projects.
